

Personal Statement

As a first-generation college student embarking on the journey of higher education, I am deeply committed to the field of Health Science. My aspiration to become an epidemiologist or ultrasound technician stems from a profound passion for healthcare and a strong desire to make a meaningful contribution to the field. Inspired by my experiences working closely with children, I am driven by the understanding of the importance of compassionate care and the impact it can have on individuals' lives.

Throughout my academic career, I have consistently maintained a position in the top 5% of my class, demonstrating my unwavering dedication to academic excellence. Engaging in the rigorous AICE (Advanced International Certificate of Education) program has expanded my knowledge and nurtured critical thinking skills, while my involvement in various clubs such as HOSA, Key Club, and Honor Societies has broadened my horizons and enriched my high school experience.

Entering UCF in the Summer of 2020 was the beginning of an incredible journey, further supported by the Bright Futures Scholarship and the Top Ten Knights scholarship. These scholarships have not only covered my tuition and housing but have also allowed me to focus on my studies and campus involvement. As I approach the completion of my undergraduate degree in Health Science in Spring 2024, I am eager to pursue further education and deepen my understanding of public health.

Looking ahead, I am enthusiastic about pursuing a master's degree after obtaining my Bachelor's degree, with a keen interest in public health. My goal is to specialize in either epidemiology or sonography, leveraging the foundation and knowledge I've acquired at UCF to excel in my chosen field. I am excited about the opportunities that lie ahead and am confident that my dedication and passion will guide me toward a fulfilling career in healthcare.
